* register on class provider's website

** complete registration form and return form to school office

Note: No classes on school holidays

Descriptions for Upcoming Classes

Fun with Math for Kinders

www.mcclureclasses.org

The emphasis in this enrichment class is exploring number concepts and theories through a multitude of hands-on activities. A mathematical environment will be set up to encourage children to think, investigate and to make number connections. Through educationally sound games, collaborative tasks, and the use of a lot of manipulatives, youngsters will have a positive experience with math while being actively engaged in their learning. Cost \$72

Reading for Kinders

www.mcclureclasses.org

In this class, alphabet, phonics, sight words, and other skills for beginning readers will be taught through educationally sound games and activities. These will be aimed at building kindergartners' ability to "crack the code" of written language, take ownership of it, and approach learning to read with confidence and enthusiasm. Cost:\$72

Ukulele

Register here: <https://hummingbirdmusicschool.pike13.com/courses/199763>

Ukulele Class is a fun class designed specifically to introduce TK-8th grade students to the ukulele. Students will learn correct hand position, finger picking and strumming styles, note and rhythm reading, and will learn to play popular, traditional, and classical tunes like Riptide, I'm Yours, Counting Stars, Oh Susanna, and Ode to Joy. Students must bring their own ukulele, and each student will receive a lesson book. Students are divided into groups based on age and/or experience. Tuesdays at 2:45-3:30 pm, April 9-May 28th. \$296 for the session.

Piano

Register here: <https://hummingbirdmusicschool.pike13.com/courses/199762>

Piano Class is a fun class designed specifically to introduce TK-8th grade students to the piano. Students will develop the foundations of piano playing, including correct hand position and posture; will learn to read notes, rhythms, intervals and other music notation; and will learn to play popular, traditional, and classical songs. Keyboards are provided at class, and each student will receive a lesson book. Students are divided into groups based on age and/or experience. Wednesdays at 2:45-3:30 pm, April 10-May 29th. \$296 for the session.

Skateboarding

Call Society Skateshop at 650 703-8678 for information.

This program is designed for street style skateboarding (without skate ramps). The students will learn fundamentals of skateboarding such as proper stance, pushing and basic skateboarding tricks such as tick-tack, ollie, kick-ip, grind, and more. However, the class caters to all skill levels. The students will also be introduced to traditional and electric longboards. The class includes skateboard educational content such as skateboard assembly, grip taping techniques and more. Skateboards and helmets are required and safety pads are strongly recommended. Indoor classroom will be available for rainy days.

Art with Danny - Creatures of the World

dannyg.art@gmail.com

This fun art class is designed to help students learn to draw a variety of mammals, birds, reptiles and fish. We will create creatures using a variety of medias including pencil, paint, and pastels. I will guide the students through a series of step by step demonstrations working with simple shapes to develop our drawings. Students will learn how to take apart an image and to define it's simple shapes within. We will discuss the patterns and designs seen in the fur, feathers and skin of the creatures we are illustrating. Cost: \$250
